Furthermore they have realized that this will lead to more natural catastrophes, than have already occurred. The scope of the present assignment is to point out what the international climate politics for reducing the human-based greenhouse effect and what is the status quo of emission reduction measures are. Therefore chapter one highlights the fundamentals of the greenhouse effect and which gases trigger it. Especially the carbon dioxide emissions lead to an increased warming of the earth with an amount of 9-26 per cent. The main cause for the greenhouse effect with approximately 50 per cent is the burning of fossil energy sources like petrol or wood. Chapter two characterizes the development of international climate politics. Beginning in the year...
