OCLC Number: (OCoLC)167808626 Subject: Measuring instruments -- Testing. Excerpt: . . . The third manifold system consisted of individual glass sampling canes located as shown in figure 3. These canes were constructed from 75-mm ID glass pipe identical to that used for the primary manifold. (See fig. 5.) A 20-cm section of pipe containing three sampling ports was located 4 m from the inlet. This 20-cm section then provided sampling ports similar to those used on the primary manifold. Se CO and NO groups. Each inlet was a manifold of this type were provided for the proximately 6 m above the ground. A roots blower located on each cane at ground level provided continuous flow rates of 25 standard L sec. These individual sampling canes provided two important functions: The capability to sample ambient air with significantly less residence time in a manifold than available from the longer primary manifold and the capability for comparison of measurements from...
