

# Technology Acceptance and Diabetes

By André Calero Valdez

Apprimus Wissenschaftsver Aug 2014, 2014. Taschenbuch. Book Condition: Neu. 210x148x22 mm. Neuware - The present work deals with the user-centered design process and its impact on technology acceptance of small screen devices for diabetics. The aim of this interdisciplinary work is to conceptualize a compact diabetes management assistant that meets the needs and requirements of its potential users. Moreover, a better understanding of the relationships of technical expertise, domain specificity, diversity and user acceptance should be obtained in relation to medical technology. Another research question deals with the purposeful endowment of acceptance: Can the usercentered design process, when it is accompanied by methods of technology acceptance research, systematically generate products that show more acceptability Diabetes mellitus is a complex syndrome that puts health-care systems of all major industrial nations to the test. Diabetes cases worldwide are on the rise. The prevalence in Germany is estimated at 12%, roughly 10 million afflicted, with increasing incidence. Due to different causes (e.g. viral infections, genetic factors, obesity, poor diet, age, pregnancy), the body loses the ability to maintain its own energy-metabolism in homeostasis. Common to all cases of diabetes is a key symptom: insulin deficiency. To bring this regulatory circuit back into balance...
